YOU'VE FINISHED!

Program Milestones

Program milestone courses should be taken in the term and order noted.

*Indicates courses that must be taken at York County Community College in order to be eligible to apply for the MHRT/C certificate.

Make Your Summers Matter

General education requirements
Abnormal Psychology
Program Electives that will count towards both the BHS degree and the ADC certificate (Crisis Intervention, Alcohol and Drug Counselor Overview)

General Advising Notes

- Complete Statistics and College Composition as early as possible.
- General Biology is strongly recommended to fulfill the Core IV requirement, especially for students considering attending a four-year school in the future.
- If you are planning to attend a four-year school after graduation work closely with your advisor to identify a program and choose electives that will make the transfer process as smooth as possible.

Part-time option available, please refer to the college catalog.

The sequencing of courses in this program begins in the fall or spring semesters. Students entering in the summer will likely take longer than two years to complete the program.

Program Description

The Associate in Applied Science Behavioral Health Studies program is designed to prepare students with the necessary knowledge and skills to pursue a position in the mental health field or continue their studies at the Baccalaureate level. Areas of study include trauma, vocational rehabilitation, substance abuse issues, human development, cultural awareness, counseling theories, victim advocacy and the role of mental health providers. Graduates of the associate degree program are also eligible to apply for the Mental Health Rehabilitation Technician Community Certification (MHRT/C). This certificate represents the minimum licensing qualifications necessary for working in the mental health field in Maine and is required for all positions funded by the Maine Department of Health and Human Services. Graduates will also be eligible to apply for certification, at the provisional level, as a Victim Advocate by the National Advocate Credentialing Program. Graduates of this program will obtain a marketable degree with two embedded certifications which will allow them to work with multiple populations including individuals confronting mental illness, developmental delays, substance abuse, and other behavioral health conditions.

Program Learning Outcomes

Students who successfully complete the Associates in Applied Science in Behavioral Health will be able to:

- Articulate an understanding of the ethical principles involved in the human service field and how situational factors might impact the interpretation of those principles.
- Engage in assessment and collaborative service planning with clients, their families, and human service professionals while understanding the potential barriers clients may face in accessing resources.
- Demonstrate an awareness of personal and professional development in order to remain effective and promote optimal functioning for the self and clients.
- Utilize technical skills to effectively gather, analyze, evaluate, and share data while conforming to both legal and ethical guidelines for accessing and distributing confidential information.
- Communicate the importance of inclusion, cross-cultural sensitivity and diversity.

Career Opportunities

Qualified graduates of the Behavioral Health program will be eligible for entry level employment at community health centers, hospitals, schools, social service and mental health programs, and child care settings. Specific jobs may include, but are not limited to, Community Support Worker, Residential Service Worker, Rehabilitation Technician, Youth and Family Counselor, Education Technician II, Case Manager, Direct Support Professional, Life Skills Coach, Victim Advocate, and In-home Support Worker.

*Articulation agreements exist between York County Community College and various colleges and universities.
Please work with your advisor for information regarding these agreements.*
